	Lessons learned	
	Areas for Improvement	
Right Spotter	Review of mission What was done	
	Lessons learned	
	Areas for Improvement	
Left Spotter	Review of mission What was done	
	Lessons learned	
	Areas for Improvement	

Debrief Guidelines

Event Simply the name of the event (Ex: SX20130525)

Tasking Description Put the full tasking description as given, including any in flight retaskings

Left Column Put the crew member's name in the respective left column block.

Review of mission What was done

Put comments here on what tasks were done, plotting the tasking, briefing, call arounds executed. Try to keep in mind the info that is needed for the training record. For example if an Aural Null was done, which method was used, was off tuning used to narrow the target area.

Lessons learned

Identify any items that the crew member learned from the mission. This could be a new skill, or the result of something that occurred on the flight that highlighted a lesson. This area may also be used to note items that the member did particularly well on the mission.

Areas for Improvement

List any areas that were highlighted as needing more training or review. This could come from the member themselves or from other members of the crew in the debrief discussion. This must be done in a constructive manner, this is not for pointing fingers at mistakes but for directing future training.

Keep in mind that this form is intended to drive the member's training record and their training programme. Using the information listed here we'll be able to direct training resources to ensure that the member progresses in a new role and can improve their skills in certified roles.
